

Quick-start guide

Let's put STEM to work!

Ontario STEMterprise is a unique STEM teaching resource that turns students into entrepreneurs! It is project-based, cross-curricular, and integrates STEM and other transferable skills. At the core of students' learning is discovering where their food comes from and how it gets from field to fork.

Simple to Use	Engaging	Effective
<p>Scan the QR code below to download the nine lesson plans and access accompanying resources, including videos.</p> <p>Sign up for a virtual visit with a farmer to discuss farming and protecting the environment.</p> 	<p>Take students through the stages of creating their own business from the ground up!</p> <p>Lesson plans include everything you will need to teach students about growing and monitoring their "crop," developing a product, conducting market research, designing sustainable packaging, and selling their creation.</p>	<p>A wide range of STEM-based topics and activities. Some might be surprising! (Living soil?! Robot farmers?!)</p> <p>Students will learn plant science; apply the engineering design process; work in groups; and sharpen math skills by determining their product's selling price and making change at their bake sale.</p>
